- Output resolution up to 1920 x 1080 (Full HDTV)
- Password and network port security features
- User and Administrator Right capabilities via InfoZone server
- Connects as player/client to InfoZone media management server
- Or, connects directly to MediaZone GUI in standalone mode

Optimized Player Hardware Preloaded with MediaZone Digital Signage Software

Our optimized player hardware excels at delivering everything you need in a digital signage turnkey package. The MediaZone Digital Signage System comes preloaded with software and tested at the factory, so you don't have to take up precious time and resources loading software and working through inevitable snags. Combined with a display, you'll have all you need to create a digital signage channel that advertises, alerts, entertains and informs your viewers with the most up-to-date information.

By minimizing extensive configuring and time-wasting setup, our MediaZone system adds considerable value over buying an off-the-shelf computer that may or may not perform well. But with the Keywest-configured rack-mount player, you can be assured that your digital signage playlist will play smoothly and reliably for many years to come right out of the box.

Our MediaZone rack-mount system is provided in a standard 1-RU chassis that performs well under the extreme demands of digital signage applications. Our rack mount system includes Wi-Fi and RS-232. Digital TV tuner with video input and a CD/DVD drive are options.

Preloaded with our award-winning digital signage software—MediaZone—it supports a wide variety of media files for scheduled playback of individual media or sets.

And fortunately, building your media playlist is quick and easy with our template-based MediaZone editor. Simply import media assets from the clipboard and place them into the user-configurable template. Media assets can be configured to run full-screen or in a "zone," giving you the look and feel that works best for your application.

MediaZone has raised the bar when it comes to delivering optimal results you can witness for yourself. It is a proven champion that satisfies the most demanding digital signage requirements—all this at a price that makes it an exceptional value. Why not put the power and flexibility of X to work for you?
